

## LETTER OF REFERENCE

Wamech company designs and delivers intralogistics systems for our production plant – V-Liner platforms together with dedicated trolleys.

Implementation of fully mechanical transport systems consisting of trolleys and platforms allowed us to significantly lower the costs of their service and exploitation. Solutions of aforementioned devices guarantee both intuitional use and the highest level of safety for the users. Our employees appreciate also their ergonomics thanks to which the internal material transport has become much easier. Placed orders are always realized fairly and on-time and in any case of problems or doubts we can rely on fully support on the producer's side.

Business relationship between our companies has started in 2010 and since then we have been continuously cooperating. Experience gained so far allow us to recommend WAMECH as a producer of dedicated devices for internal logistics.

Mariusz Karolewski  
Logistics Director
